As per our standard protocols, every classroom is electrostatically disinfected with our sprayers on a daily basis. In addition, each desk is also disinfected by hand throughout the day and students are required to wash/disinfect their hands every time they come into the classroom. Each room is equipped with a commercial grade air scrubber for air sanitization. We have installed touchless drinking fountains throughout the campus. We also enforce these protocols as well:

Requiring masks for all staff and students.

Health screenings before entering campus.

(Temperature check/health questions)

Maintaining social distance whenever possible.

Requiring handwashing and hand sanitizing throughout the day.

Disinfecting high touch areas throughout the day.

Disinfecting playground equipment throughout the day.
